

CONVENIENT.

Your milk supply is always on hand as the system provides cool fresh milk at the turn of a tap. No need to store crates and bottles. Additional boxes can be stacked in your refrigerator, ensuring better utilisation of space.

HYGIENIC.

Your milk is protected, the tube is sealed, nobody touches it and it is never in contact with a contaminating surface. No need to clean, environmentally friendly with a lower carbon footprint.

COOL FRESH MILK ON TAP IN A REFRIGERATED DISPENSER

ECONOMICAL.

Saves staff time. Ensures tighter stock control. Eliminates waste of product, no spillage, no need to keep opening the fridge. No capital outlay for dispenser necessary – can be rented.

COOL FRESH MILK ON TAP DESIGNED FOR THE BULK USER.

LAMBRIANOS PACKAGING SYSTEMS

Convenience packaging has become part of our modern lifestyle. Nowhere is it more essential than in the provision of foodstuffs where hygienic, bulk, convenience packaging is essential.

Lambrianos Packaging Systems specialises in the production of plastic bags for the bulk packaging of milk and in addition provides the system for the most hygienic way to dispense milk.

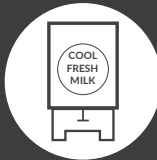

PAK-O-MILK - THE INDUSTRY SOLUTION FOR THE CONVENIENT AND HYGIENIC STORAGE & DISPENSING OF MILK.

HOW DOES IT WORK?

Order your Pak-O-Milk bag in the box from the dairy. It will arrive like this.

Put your box into the dispenser, release the tube from the box and slot into tap. Shut the door.

For cool fresh milk at any time push the tap and fill your jug or glass or tea cup.

When the milk is finished, take the box out of the dispenser. That's it, no need to clean. Both bag and box can be recycled.

OPERATING TEMPERATURE - Thermostat control ensures that the fresh milk is stored at a consistent 2-5°C and will maintain this temperature even in a hot kitchen up to 32°C.

ELECTRICAL LEAD for AC220/240 volts - VAC 50Hz.

MINIMAL ELECTRICAL CONSUMPTION.

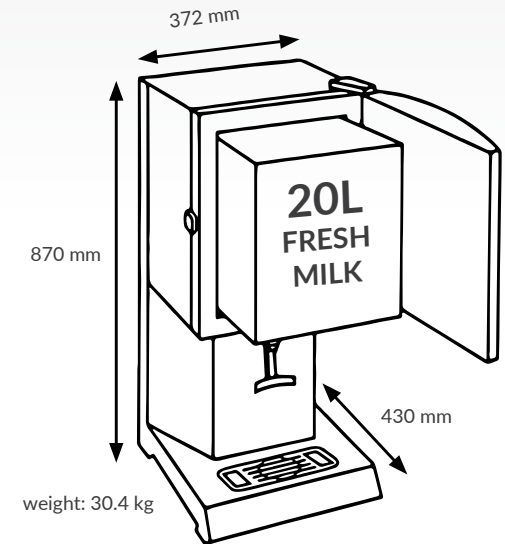

Supplied with **STAINLESS STEEL DRIP TRAY** as standard.

SIMPLE SINGLE HANDED OPERATION with spring loaded push-dispense tap.

RUBBER OUTLET TUBE SEALED until ready to use.

OPTIONAL - LOCKABLE DOOR LATCH and **ANTI-BACTERIAL COATING** of tap and internal surfaces.

Dispensers are available in powder coated white or brushed stainless steel finishes - can be branded.

The functional simplicity of the dispenser makes it robust and durable. The dispenser is manufactured locally and spare parts are always available. The system enjoys proven success in the South African Market.
